

MAYCON VIEIRA DE SOUZA SALVADOR

Dourados, MS – Brazil | +55 67 98415-9947 | maycon.salvadorr@gmail.com

■ Objective

Software Engineer with hands-on experience in system analysis, technical support, and software implementation. Seeking international opportunities to contribute with innovative solutions and improve technological processes.

■ Education

Bachelor's Degree in Software Engineering – Unigran University

Graduation Date: June 6, 2025

■ Additional Training

- Oracle Next Education (314h) – Java with Spring Boot Specialization (Completed: Dec/2024)
- Complete Front-End Course 2.0 – Danki Code (Completed: Oct/2023)
- Algorithms Course (40h) – Curso em Video (Completed: Feb/2021)
- Hardware Course (20h) – Curso em Video (Completed: Mar/2021)

■ Professional Experience

Backend Developer

Kartado – Florianopolis, SC (Since Jul/2024)

- Platform configuration: forms, permissions, and modules based on client needs.
- Script development in Python (Jupyter Notebook) to automate tasks and optimize system implementation.
- Data integration and processing, including KMZ/KML file conversion and structuring information into JSON.
- Conducting user training and technical support.
- Validation and testing to ensure configurations meet requirements.
- Process documentation and optimization to improve efficiency.
- Participation in strategic meetings for workflow analysis and improvements.

Support Analyst

Dourasoft do Brasil Ltda – Dourados, MS (Oct/2022 – Nov/2022)

- Technical support to internal and external users.
- Diagnosis and resolution of issues in enterprise management systems.
- Software update testing and deployment.

Commercial Consultant | Implementation Analyst

Ganso Sistemas – Nova Andradina, MS (Jun/2021 – Aug/2022)

- System implementation and client support.

- User training and software performance monitoring.
- Commercial consulting and technical support for clients.

■ Technical Skills

- Advanced Python – Process automation and data handling.
- Django – Scalable and secure web applications (backend/API focus).
- Power BI Integration – API configuration and data analysis workflows.
- Java & Spring Boot – High-performance, structured backend development.
- React – Responsive and user-friendly web interfaces.
- System Implementation & Support – Platform configuration and user assistance.
- Client Training & Support – Effective client onboarding and technical guidance.
- Problem Solving & Analysis – Troubleshooting and system efficiency improvement.

■ Highlights

- Versatile experience in both technical and customer-facing roles.
- Strong ability to solve complex problems and guide users effectively.
- Solid academic background with specialization in Python/Django and Java/Spring Boot.
- Dynamic profile with experience in commercial consulting and systems analysis.
